

# Gray Aliens Working with US Military in Child Abductions

**Melanie Charest,  
Michael Salla**

## Gray Aliens Working with US Military in Child Abductions?

<https://rumble.com/v598tf0-title-Gray-aliens-working-with-us-military-in-child-abductions-wtf.html> 8-2-2024 August 1, 2024 74 minutes

Melanie Charest was first abducted by Gray extraterrestrials in 1970 when only 4/5 years of age and was next taken to a remote military facility for an unknown period of time. She and 7-12 other children were abused by scientists and military personnel conducting medical experiments and for other sinister purposes such as a galactic slave trade, Satanic human sacrifice, ritual abuse religious ceremonies, [adrenochrome](#) harvesting, biological experiments, sex trade, etc. Charest asserts that children taken to the military facility were held in inhumane conditions that involved torture, injuries, and advanced healing technologies that would be used so the abusive experiments could be resumed.

In 1981, she was again abducted by Gray aliens along with 12 females approximately 15-16 years of age, some of whom came from different temporal periods. She was used in genetic experiments where her eggs were harvested for creating hybrids. Charest says that she was rescued from an underground facility by her galactic family – human-looking extraterrestrials associated with the Solaris mothership that belongs to the [Solar Warden](#) Secret Space Program. She claims to have been part of one of the rescue teams for enslaved children and provided them emotional assistance.

The scope of this huge illicit network of DUMBs previously described by [Gene Decode](#) combined with the millions of these galactic slave

trade victims described here created by various agencies produces a monumental enforcement and disclosure problem. It also generates hundreds of billions of dollars of illicit off the books blackops money for expansion and deep state corruption. To Satanists the value of human life is what it will bring on the open market, personal sovereignty is nil.

Melanie Charest is working on her first book.

**[Transcription warning:** Because of the broken English and verbal irregularities, anyone who wants to reassure the interpretation is an accurate rendering of intent will need to satisfy themselves by personally listening to the audio. This is a *very important interview* deserving of patient understanding of the bravery of the witness in reliving these traumatic memories.]

**Dr. Salla:** Melanie Charest is from Quebec, Canada and she is a lifelong experimenter with both positive and negative extraterrestrials. Her first extraterrestrial contact experiences began when she was four to five years old and she has had experiences after that both positive and traumatic and she has remembered some of the more positive experiences in subsequent years but three years ago she began to have the full memories of the most traumatic aspects of her contact experiences involving negative extraterrestrials. So she's with us today on Exopolitics today to tell us about her experiences.

**Announcer:** You're listening to Exopolitics Today with Dr. Michael Salla, your source for the uncensored truth regarding the human extraterrestrial global and political agenda. Click the like button and subscribe to this channel and now here is Dr. Michael Salla.

**Dr. Salla:** Well welcome, Melanie to Exopolitics today.

**Melanie:** Thank you. Thank you very much. How are you Michael?

**Dr. Salla:** Very well. Thank you. Well let's begin with 1970, you're four to five years old and you are visiting your maternal grandmother's property and you had an experience and you were within that experience you described being with other children in that were roughly similar to you in age from four to seven years old. So can you tell us about this experience in 1970?

**Melanie:** Yes sure. The military base organized a party in the summer

and I went to this party with my grandmother because my grandmother worked in the military base. Okay and it's a family party and I went with my grandmother at this party and this moment I am four five years old.

(sorry because my English I have difficulty a little bit )

Okay and I play in the garden with my grandmother and I have found everything is okay and suddenly I find myself in a dorm room. Okay, and in this dorm room little beds, the older beds with the metal beds. Okay and all the woolen blankets that look like military blankets, green or brown like this khaki and other children maybe six to twelve children and from four to seven years old and we are in this room with no natural light, no windows and it's a very bad place.

**Dr. Salla:** Now can you describe what the feelings were when- you're in that dormitory with the other girls, the other children, were they all girls or were there some boys?

**Melanie:** There were boys too, two girls and boys and we have pajamas. Yes, beige pajamas, two-piece beige. All children have these pajamas and so suddenly we we're just there and nothing to do. A military guardian came in this place and it just looked us and said "Now go to line up for triage, sorting out at the triage desk.

And me, I'm just at the middle desk. And another desk to my right. And the boy child is happy and he laughed with a smile just because he thinks he goes to a family, goes home to find a family.

And me, I know. I don't know why what I know, but I know the outcome. You can't go to a family. You go there for food. Because the bad extraterrestrials. So it's just your tree out. It took every child from our planet, but not only this planet. And other planets. It keeps children. children serve for sexual abuse, slaves, for food.

You know, it's the same with the human. Humans eat animals here. And it's okay with animals. And this extraterrestrial do the same, but with us and for genetic experiments. And me, I serve with this for my team.

**Dr. Salla:** So just to summarize what you just said. So you were taken, when you're four to five, to this dormitory-style facility. You were abducted by aliens. You're taken to this facility. There were dormitory-style beds. Stacked up one against each other. And the children, there

was between six to about twelve children. And they aged between four to seven. And now you described that there was blood on the clothes. Oh yes. And that was that these children were being tortured and abused. And when you went there, you smelled a lot of things. So you want to explain what smells?

**Melanie:** When I arrive in this place, it's the first impression.

**Dr. Salla:** First impression.

**Melanie:** Yes. The first impression is the smell is very bad. You smell your urine and shit.

**Dr. Salla:** Feces.

**Melanie:** Yes, feces. Okay. And I feel fear, fear.

**Dr. Salla:** Fear.

**Melanie:** Fear. Because when you are a child your soul is pure. And you don't know that another human can harm us. But day after day, the military came and abused us. And why I know that? Because when these guys, the military came and go in the files.

**Dr. Salla:** In a file.

**Melanie:** In the files. Single files and went for triage. I see the first children and the second children, have blood in the back vent.

**Dr. Salla:** In the rear anus area, the back to the pants.

**Melanie:** Yes. And the third children came and see that one, two, have blood. Oh, maybe I have blood too. And the children check in the back. And... Yes, for me, if I have this too, in my back. I checked too, because... Oh, you have blood. She's having blood, so I checked. But I don't have. Okay. This is how I actually understood they were abusing us.

**Dr. Salla:** How many days were you there at this facility, where this abuse was happening?

**Melanie:** How many days? I don't know exactly. But, I want to tell you I have memories from when I was young. I was waking up. My pajamas were reversed. Yes. And I don't know why my pajamas like that. When I was young, I think "Oh, maybe I just turn around, turn around in my bed, and maybe my pajamas turn around. That's it." I don't know why. And my body's turning, my body... Not upside down. Yes, upside down in the bed. And... Oh, maybe because I move. But when this memory came back, my head I linked this situation, in my

bed with my pajamas reversed.

**Dr. Salla:** And the link is...

**Melanie:** And I thought this is the bad extraterrestrial, it keeps coming, not to one shot... It came... It took me... Maybe it came back, and it took me another time.

**Dr. Salla:** So you were having abductions from negative extraterrestrials, and at some point, you were in a military facility. Now, is that because the extraterrestrials were working with the military?

**Melanie:** I think it's like that.

**Dr. Salla:** Okay. Now, this young boy that you said was very happy, because he thought he was going home, but you somehow knew that he was food. So you want to explain what that meant? What you meant by he was food.

**Melanie:** How I explained before, this extraterrestrial, it keeps the children for everything, for food, or for everything. And you know, adrenochrome.

It takes fear, extra fear, terror. And I know it's not only extraterrestrial, but the [elite](#) also do this to these children to produce a substance. And the name is adrenochrome, a substance for more young or...

**Dr. Salla:** For more rejuvenation of people. Yes. It prolongs life. Yes. Okay, so this boy was being used to produce adrenochrome and the child is eaten as food.

**Melanie:** It takes fear, extra fear, terror.

**Dr. Salla:** So they produce adrenochrome

**Melanie:** And so...

**Dr. Salla:** So you are in this dormitory, the children are being abused, mistreated, but you have described that they would give you some medical healing, so that you would be healed and they can restart the abuse again.

**Melanie:** Yes, it's right. They gave us a drug, because you know when they abused us, it's very difficult for a body and, sometimes the soul...

**Dr. Salla:** [hand motions] soul extraction?

**Melanie:** leaves the body, because it's too difficult, it's too, too much. And the soul leaves. But when I come back, when the soul comes back in the body, it's difficult because the body is wounded. And the

military gave an injection of drugs for the body to recuperate, so you can recover health.

**Dr. Salla:** To restore health.

**Melanie:** To restore health. Okay. And because when they abused us after, they don't want to hear crying and shut up, we give you drugs and shut up and, okay. And the body restores.

**Dr. Salla:** Restores.

**Melanie:** And, because the next day, again, maybe do that again and again, and it's better for this guy to do his job.

**Dr. Salla:** So, so this incident happened to you in 1970, you are four or five. What made you think or were you told that there were millions of children involved in this?

**Melanie:** Oh, when I'm young, I don't know if a lot of children, but after, I went to the rescue of children and it's me and my team, we went rescue children. And now I know a lot of children.

**Dr. Salla:** Okay. Well, we'll come back to that and look at that, the rescues of the children. So you didn't know at that time how many were involved, but later on you found out that there were millions of children involved, being taken and abused in this way. Now you say children were used for many different things and you explained some of those things, different types of abuse, sex slaves, slave labor, food, sacrifices, adrenochrome.

Now you also talked about genetic experiments and that you were involved in genetic experiments. So can you tell us what were the genetic experiments that you were involved in or used for?

**Melanie:** Mm-hmm, after the memory of a young girl in the dorm room I have another memory come. And, I'm in this place, it's like the same place, but now the young woman, maybe from 14 to 17, like this. And, this room, it's only for the woman for genetics and I'm in this room.

Every, woman I don't know, maybe, like a dozen young women. And some not look us, three or four woman look like Louis 15 period because she's have a beautiful dress, the big dresses, and white wigs, but not a style like today. Dirty, the face is dirty, and, she doesn't know what she is doing there. Not every woman is dressed like that. And I

know it's because the extraterrestrials have a capacity to go to the timeline, another timeline, and go there, and, another time. They just, oh, I want this one, I keep it. I want this girl, I keep it. They go and they keep, from the timeline.

**Dr. Salla:** Okay, so we're, what you're describing is that when you were about 16 years old, 16, 17,

**Melanie:** 15, 16, and...

**Dr. Salla:** Okay, so in that time, frame we're talking, say, 11 years later, after the first incident in 1970, you remember being taken again by these extraterrestrials, negative extraterrestrials, and you remember being with, about a dozen girls, and, and some of those girls came from an earlier time period, and they were totally confused and didn't know what they were doing. And so then what were the extraterrestrials doing this? Do you remember what they look like?

**Melanie:** I don't know about you.

**Dr. Salla:** I thought you remember how they looked. Yes. Yes.

**Melanie:** And what did they look like? I looked this, and I know they can do this.

**Dr. Salla:** I see. Okay. Last year I was at the Galactic Spiritual Informers Connection, and you were there too, and we saw Tony Rodriguez give a presentation where he went to Inyokern, California, and he found a building where there was a dormitory where he says he was kept, and the beds were close, and he said that they were being tortured. So you were there, and so can you describe what happened when you saw Tony Rodriguez present his video and his testimony of what he experienced at Inyokern, given what you've just described.

**Melanie:** When I saw this picture of Tony, oh, it's my body was entranced with shock. I'm shocked because it's the same place. Maybe it's not the exact place, this one, but it's really, really similar. The similar brown wall, and long aisle of small beds for children, it's same, and, do you remember in the picture of Tony of a two partition walls like this? Mm-hmm. It's like a stable. Like, stable. Do you remember this picture? It's like this, the picture of Tony. Okay. When I see that, I remember, oh my God, because I describe this room of, Tous-chant-chant, before I see this, the picture of Tony. Is it, is that

okay?

**Dr. Salla:** That's right.

**Melanie:** Because the woman, Louis 15 is in this stable.

**Dr. Salla:** I think it's more like a cubicle, these are different cubicles, right? That's a good word, yes. It's like this. Now can you describe, so they're different cubicles.

**Melanie:** Yes, different cubicles. And this woman in the cubicle. In the cubicle, another, it's empty, but this one, three or four, this woman.

**Dr. Salla:** Mm-hmm. Okay, so you're with the other girls. So your memory matched what Tony Rodriguez.

**Melanie:** Oh, exactly. Maybe extraterrestrial with the army here, military, have a different place on planet. Mm-hmm. And, but the the same kind of building, the same.

**Dr. Salla:** I'm sorry, I'm sorry. So, so what we're hearing is that there are these extraterrestrials, negative extraterrestrials, Grays, that they're working with the military, and children are being abducted, taken to these places where they're kept, and they put through all of these experiences that you described.

**Melanie:** Is there a particular conflict?

**Dr. Salla:** I'm just trying to summarize what you said.

**Melanie:** Okay, yes. Okay.

**Dr. Salla:** All right. So you're 15, 16. You're in this facility again. You've been taken there. Now, one of the girls is taken away. So what happened next? Because, yes, what happened after one of the girls was taken away?

**Melanie:** And the military came again. Another, I don't know how it was the same, but he came and to take a woman for taking the eggs from the woman, eggs.

**Dr. Salla:** They want to extract eggs from the ovum.

**Melanie:** Yes. I went, in my bed and I don't move. I don't move because I don't know, but this guy, he know which one at the foot in my bed. I don't move. I don't know who he is coming for. And he took, another woman. And I know it's for...

**Dr. Salla:** for the generic extraction of eggs. Yes. I see. So that was happening. The girls were put there and you were put there for eggs in

the ovum to be extracted, to be used in these genetic experiments. That were being run by who?

**Melanie:** My feeling, I'm not sure and I think it's the Mitra.

**Dr. Salla:** Mitra I think it's good. Yes, okay. All right, so we're talking what people would as Gray extraterrestrials, but more specifically them a group called the Mitra working with the military that were running these experiments. Yes. So tell us about the rescue that happened. How are you rescued from this situation?

**Melanie:** Okay, my galactic family came, maybe it's like a rescue team with my family. They came to rescue me and I'm very, because I think it's a drug I have in my body, they took me and I let myself be carried and I know I went to their Spaceship and they gave me a lot of love and they put me in the med bed for my body examinations and restoration of my body, restoring my womb and they gave me a lot of love for emotional support of bad memories in the museum because it's better that that children don't commit this to memory, don't remember this because it's too traumatizing and if you want to have a good life or better life in this timeline, they block this memory.

**Dr. Salla:** Okay, so this was your galactic family of positive extraterrestrials that removed you from that situation that was military and Mitra Gray extraterrestrials that were using you for genetic experiments. They took you from that situation, took you up on a ship healed you and restored your body and reproductive system so you would be healthy and then they removed all your memories of this traumatic incident. And this is why it was only three years ago that you remembered this.

**Melanie:** Do you want me to explain this?

**Dr. Salla:** Yes, please.

**Melanie:** Okay, I have a vivid dream where this memory arrived and when it came to me. When I woke up I cry and I cry for hours and Jean Charles Moyen was right there "what's up, what's up my love, what's happened" and I explain these memories and I know when I cry, cry, cry. It's a liberation for me.

When you have this memory arrive you link it with your life, your memory of it and you are linked. Now I know why I have a big problem with my system that comes up all year, a urinary infection that started

at four years old and when I'm teenager I have a big problem with my system too, an ovarian cyst.

**Dr. Salla:** What do you remember about your galactic family and do you know anything about the ship that you were taken to after the rescue?

**Melanie:** I know the family is blue. They have blue skin, no hair, a little bit long elongated skull...

**Dr. Salla:** elongated skull

**Melanie:** and long arms, long legs and thin fingers. They're very loving, a lot of love.

**Dr. Salla:** And on this ship where you were rescued, do you know the name of the ship and can you describe who was helping you?

**Melanie:** Yes, it's the Solaris

**Dr. Salla:** And do you want to explain what the Solaris is because not everyone will know what this is.

**Melanie:** Okay, the Solaris is a spaceship and in the spaceship are lots of teams for rescuing the children and adults too, another planetary system and the spaceship belongs to the Solar Warden program.

**Dr. Salla:** So the Solaris is one of the space carriers belonging to the Solar Warden program and some people have described it as a joint French-U.S. Mothership.

**Melanie:** That is that correct.

**Dr. Salla:** That's cool. Okay? Now when you return back after the experience are your memories gone? Have they removed your memories? Did you have any memories at all or just you didn't know your 15 16? And you don't remember anything about these negative experiences. You don't remember anything about being rescued. You don't remember your galactic family when you're 15 16 before.

When you returned after the ship after being on the Solaris all your memories were gone or taken and so you lived a normal life?

**Melanie:** No, I have the experience with object Dematerialization and Rematerialization, a long way.

**Dr. Salla:** Teleportation? Telekinesis?

**Melanie:** No. Very far very far. Okay. I give you an example. Okay. I have this a ring on my necklace, because it's too small because I have

a when I was three years old my aunt give me for my birthday when I turned two years.

But it's too small so I put it on my necklace and suddenly I went in the garden and was used to put my finger in the ring and like this and I know the ring is there. But when I came back in house oh Where's my ring? Where's my ring? No ring. I went to my father "Dad, I don't have my ring. I don't know where is it? It's impossible. It's strong. It's strong. Well one year later my father went in the garden and "Oh it's a ring and it's not broken I think my necklace is on my neck I'll come the ring just disappears and reappears in the garden, but it's intact, not broke or nothing or this is an example. I have another.

**Dr. Salla:** Let's see, okay.

**Melanie:** So I have an object in my pocket. You need the pass for take a bus and you just look my pass came and I went to the school and I need to take a bus for go to school. Oh, where's my pass? No pass, it disappears. Okay, the driver of bus, he recognizes me so all okay. Just go. I know and when I arrived in the school I opened my locker, a closed cabinet with a lock. I unlock & open, my pass is there.

**Dr. Salla:** It's some kind of teleportation of objects. So when did you begin to work with the with your galactic family to start rescuing other children. When did that happen for you? Do you have memories of this so if you describe your memories of being part of your galactic family rescuing the children.

**Melanie:** Okay, you want me to explain the rescue, when my team came to the rescue?

**Dr. Salla:** Maybe before describing the mission, maybe explain how you became part of a rescue team.

**Melanie:** Because I'm a galactic and with my other galactic body I went to rescue.

When I came here in this body I do this again because I have this ability with the children to rescue and because I have bad experience I know all the children ahead and I know I'll take care of the children.

**Dr. Salla:** So you are a starseed and you remember your galactic origins and you were doing rescue missions before incarnating on earth. Okay, so then because of your experiences of being abducted as a human at some point you resume your work as being part of the

galactic family to rescue human children. Okay, so can you describe how that happened? I mean you would go to sleep and then you're up on the ship and doing rescues. How would that happen?

**Melanie:** I make a rescue with my body. How can I explain that but I know it's with my body.

**Dr. Salla:** So your body is taken, your body goes up and now is it another body up there that you go into? Is it your body?

**Melanie:** I can't explain the process.

**Dr. Salla:** So tell us then about the missions. Tell us about these missions, your remembrance of you going out and rescuing other children.

\*56m

**Melanie:** Okay, when the team has a mission for rescue each team person has a different ability. The team on our night to go has invisibility to check the access for when the rescue team takes the rescued children or take out the Mitra Gray, and the team just go to check underground caverns before and after the team went in the shuttle to the Solaris that stays in the background. The shuttle goes with the team and comes up and lands and takes people. Sometimes it's not possible for teleportation from inside because it is a Faraday cage.

And so the team go take children outside and now it's possible for teleportation. It's possible now to go to shuttle and the shuttle with this or else and my team keeps children.

The adults go to another place with another team but my team takes children and we do the same thing for me

**Dr. Salla:** So you're part of these rescue teams that go into these deep underground bases where children are being kept. The Galactics extract the children and you're part of the team that takes the children out and you comfort them and guide them and then they're taken on the Solaris. Yes, and what happens then when they are taken on the Solaris? What happens after that?

**Melanie:** Okay, the same of me and we take the children We put the children in the med bed Maybe a lot of time in the med-bed and Sometimes we can't recuperate the child's body and I remember sometimes we would extract the soul, then repair the body and we put

the soul back in the body.

**Dr. Salla:** I see, so the Galactics have that technology. And you were part of the soul extraction to help heal the body. And why is that? Is it because it was too traumatic?

**Melanie:** Yes because it's too traumatic.

**Dr. Salla:** So were all the children returned to earth or were some taken off planet

**Melanie:** Not all not all children because sometimes bad extraterrestrials take people for a slave or sometimes the mother and father are dead or the children are just there and have no more family on the planet.

These children may be adopted, sometimes adopted on another planet. The children may stay on the ship and the team may adopt children or other people on the ship.

**Dr. Salla:** Okay, well tell us then about your children that you have, two hybrid children from the experiments that were conducted.

**Melanie:** Maybe I have a lot more, but I don't know. I know of two that I bred with my ovum and the Gray I bred and when I saw my children. I don't know if they are my children. I feel a little bit afraid. What are these girls? I don't know what they are.

They can't speak with their mouth so they're telepathic only and they tell me telepathically, I'm Noussane. We are your daughters and when they tell me that my whole body opens and my love just flows out me for my daughter and I just keep hugging with my arms just close to me and I said "I have a big love for you like my children of this earth."

I cry each time I speak of this and they understand why I can't stay with them and I know now they are in the system alpha- Centauri because when I go back in the awareness and I think oh shit. I forgot to ask them where you live and I heard Centauri, Centauri, I don't know this name and I checked to google Centauri. Oh, it's a star system. It's real. It's not just my imagination, it's real. It's a system. It exists and years later I speak with Elena Danaan and she showed me. Look in my book and it's the same picture I see with my vision, the same picture I saw of my daughter.

**Dr. Salla:** So your two daughters that were created because of these hybrid experiments run by these Grays, they were rescued.

**Melanie:** I think yes, I'm practically sure my team rescued my children and I know they can't stay with me. I can't keep them and I know where they went in the system.

**Dr. Salla:** So that picture of the hybrid girl in Elena Danaan's book That was of Daja Yes, okay. That was of Daja and they look very similar to your daughters?

\*71m

**Melanie:** Very similar wispy like this and long, long white long hair and the big eyes like this blue-like. Yes, it's very similar to daja.

**Dr. Salla:** Okay, so they were taken to Alpha Centauri for their safety Yes, because if they were left on earth, what would have happened?

**Melanie:** I don't know, bad.

**Dr. Salla:** Well, this is amazing information Melanie and if people want to learn more about you, I know there's a conference coming up in Colorado in September 27-29. So you're going to be there. So what will you share with this conference?

**Melanie:** This same but more detail and I want to explain my encounter with Jean Charles Moyer.

**Dr. Salla:** Wonderful because that way people if they went to that event they can not only hear you see more details see pictures of what you experience those who get to hear about the incredible connection with Jean Charles Moyer with his experiences and how you two are really like a couple of galactic lovebirds and I believe you're writing a book too. So when do you think you'll finish your book?

**Melanie:** I don't know and I need the help maybe from you or from Elena. But now I have some 100 pages. It's a process.

**Dr. Salla:** Okay, wonderful. Yes. Well, you want to thank Elena for helping in getting over the translation hurdles because Melanie is a native French speaker from Quebec and so it's very brave of you to give this interview in English without any script in front of you. You did very well. I'm very proud of you Thank you.
